No need to rush this to get it to the dean by tomorrow if we are not going to do it correctly. I'm sure she wants some time to look everything over before she signs.

If there is another cycle in December then that should give us time to get everything ready and to the dean early enough for her satisfaction.

Tom

Is this indication of support for a cyber-program proposal as mentioned below?

----- Original Message ----- From: "Robert W Roberts" To: "Thomas E Caywood" , "Sabina Burton" Sent: Wednesday, October 10, 2012 8:47:49 AM Subject: Fwd: advanced notice on a tight timeframe for a CJ Department NSF proposal. Tom and Sabina, Given the nature of Dean Throop's email "below" it may be a better choice to do the December submission instead of this submission. I have not worked with her but she is indicating that she only knows of this in very very "general terms" The last time this happened, with a project like this out of BILSA, it created some very large challenges for the principal investigator even though he ultimately received the award. I would not want to see that occur in projects relating to CJ. Call me on my land line or cell phone if you have questions. Bob -----

Hi Bob and Kathy, How soon do you think we can get the requested draft budget and draft proposal to Dean Throop along with the transmittal form? Do you think we'll able to get it to her by the end of the day today or early Thursday? Bob, if it's not ready until tomorrow you'll have to make sure it gets to Dean Throop since Kathy, Cheryl and I will all be out of the office for the Grant Administrator's Conference. Thanks, Becky Savoy University Services Program Associate Center for New Ventures/Office of Sponsored Programs (608)342-7127 savoyr@uwplatt.edu -----

I will be unavailable after 3 p.m. Thursday as that is when the Campaign Cabinet will be meeting, and I will be on the road on Foundation business Friday starting at 5:30 a.m. I will not be available to sign the form unless you bring it to me at the Campaign Cabinet meeting (and I will be unavailable between 5-6 p.m.) and I'm not authorizing anyone else's signature for this particular project. Given that the System and UW Platteville policy is 40% for indirects, I'll expect to see an indirect figure of at least \$116,000. Please provide me with whatever draft of the proposal is available ASAP. I have only heard about this in very, very general

Tom,

Here's my new journal for our CJ program: <http://www.journalofcriminaljustice.com/>

Soon I will upload some first articles.

Sabina

As you see, Tom was aware of the online journal that I set up as early as Oct. 8 (before the student complaint). If he disapproved of the content why did he wait until Jan. 24, 2013, 4 days before the check presentation to address it?

A proposal for a cyber security program

From : Sabina Burton <burtons@uwplatt.edu> Sat, Oct 06, 2012 10:14 PM
Subject : A proposal for a cyber security program 📎 1 attachment
To : Thomas E Caywood <caywood@uwplatt.edu>

Hi Tom,

I have been doing a lot of brain-storming on how to put together a unique cyber-security and homeland security program for UW-Platteville housed within the CJ department to make us one of the most progressive programs in the nation.

To organize my thoughts I put it on paper (see attachment) and hope I have done a good enough job to get you excited about my plans. I heard that some of my students approached you on Friday about being able to take more courses in homeland security related subjects. I did not put them up to this. They decided on their own to talk to you. These are very special students who are extremely thankful for the education and opportunity that CJ & LAE has provided to them and that enabled them to present at a professional conference last month. Now they want to give back and do something for our program. I have plans to utilize their energy, training and talent in community outreach programs and to use them as assistants in running cyber-crime and homeland security workshops.

Thank you for your time,

Sabina

A Proposal for a Cyber-Security/Homeland Security Program at UW-Platteville

1. **Create cyber-security and criminal justice journals (open access) for UW-Platteville Faculty, Staff & Students as well as outside scholars to publish their peer-reviewed work and be recognized outside of UWP.**
 - a. I now own the following sites: Journal of Criminal Justice at journalofcriminaljustice.org and journalofcriminaljustice.com Journal of Cyber Security at journalofcybersecurity.org and journalofcybersecurity.com
 - b. These sites will become open access journals for peer-reviewed articles.
2. **Create an undergraduate and graduate course for cyber-security.**
3. **Create an undergraduate and graduate course for homeland security (I have already developed a Special Topics in CJ: Domestic Terrorism course that could easily be turned into an elective course for CJ offered at least once a year.)**
4. **Form Workshops as a Community Outreach Program to educate law enforcement and private business in cyber-security.**
5. **Create more homeland security and cyber-security courses in the next years. E.g.:**
 - a. Foundations in Homeland Security
 - b. Homeland security preparedness and response
 - c. Advanced Quantitative Methods for Decision Making Under Uncertainty
 - d. Managing Resources and Applications for Homeland Security
 - e. Basic and Advanced Cyber Forensics
 - f. Computer and Information Security
 - g. Information and Cybercrime Seminar
6. **Develop an emphasis in homeland & cyber security within Criminal Justice.**
7. **Turn emphasis into a major in homeland & cyber security in the next years.**
8. **Build a UWP Cyber-Security Center.**

Funding ideas:

I have been able to attract a \$7,000 donation from AT&T. This is not a large grant but I want to point out that I have solicited and secured this money on my own. CJ has received around \$85,000 in donations in the past 8 -10 years so, without the help of UWP and without an established or even a program in progress to advertise, I have secured funds that represents over 10% of the funding CJ has attracted in nearly a decade.

Potential donors & sponsors for our cyber-security and homeland security plans include:
