Subject: harassment incident

Hi Liz,

Well I said I would keep you updated.

I was told today by Tom Caywood that the note slipped to a student by Lorne Gibson (see attached) was just part of an experiment. I hope it was an experiment sanctioned by the university. I can tell you if it had involved one of our daughters both Roger and I would have been furious. Three of our students in CJ confided in me that they were victims of sexual assault. This kind of experiment would not have been well received by them.

I lost time last night and this morning. Dealing with an upset student and informing Tom and Student Affairs. (At that time Tom didn't know it was "just" an experiment.) I work every night until 10 - 11 pm so you can imagine that I don't particularly appreciated the experiment. When I requested Tom to please inform us in the future of such experiments I was told that "wasn't necessary." I beg to differ but perhaps that is because I am female.

Thank you,
