Hello Rose,

I have not heard from Joyce regarding a meeting with the chancellor. I will drop off a folder with a narrative of the grievances, timelines, and evidence for the Chancellor later today. The folder has quite a bit more information than I provided to the grievance committee. The problems haven't stopped since then and the corruption and policy violations are widespread. Two major complaints were filed with the dean's office and the chancellor's office in the first two years of my employment with UWP. So I am not the first. Even though I may be perceived as a "complainer" or "disgruntled employee," this could not be farther from the truth. In my 30 years of employment in the public and private sector this is my first grievance or similar claim. I am happy to provide you with the contact information of my previous employers both in CA and in Germany if you would like to follow up on that. What has been allowed to continue in the CJ department goes way beyond normal office politics. There have been blatant policy and legal violations which have negatively affected me. The department chair practices favoritism, sexism, and retaliation and he defamed me. It has gotten so bad over the last year that I am no longer willing to take the abuse.

Thank you,

Sabina

Chancellor Shields,

I am writing you in response to your letter regarding my grievance. I appreciate the time you have given the issue but I am concerned that resolution to this issue may be months and possibly years away unless I provide more information on the issue and unless you become more actively involved.

.....

Respectfully,

Sabina Burton
